

Invitation to Join the Ecomodernist Society of North America

We would like to formally invite you to join us in the founding meeting of the the Ecomodernist Society of North America which will be starting in the South Florida region. Our goal is to build a broadly based coalition in the defense of sound science which will also be the first and only 21st Century pro-nuclear and pro-GMO environmental activist organization in the United States.

We applaud and support the many worthwhile achievements and aspirations of mainstream environmentalism but their idealism is accompanied by unproven baseless fears that have become an impediment to advances in areas such as human health, social progress, and even environmental progress. This has already led to catastrophic outcomes. In the field of medicine, resistance to vaccines threatens public health and the lives of children. The unwarranted resistance to GMOs has hampered our ability to feed the underdeveloped world and to ward off the deadly *Aedes Aegypti* mosquito, which has killed countless millions. Their failure to heed the conclusion of the IPCC that serious decarbonization is impossible without nuclear power dooms the entire mainstream climate action movement to ultimate failure. It is critical that a course correction be made.

It is our belief that, only through the new Environmentalism 2.0 that we represent, can there be any hope of putting the cause of environmentalism back on track and in sync with the rightful human aspirations for a better life. If you are interested in being a part of this new and important project please contact us at ecomodernistpodcast@gmail.com or call 786-877-8566.

We only have one Earth on which to live, which means our dependency on this planet is total. Our commitment to saving it must be just as total.

Join us!
